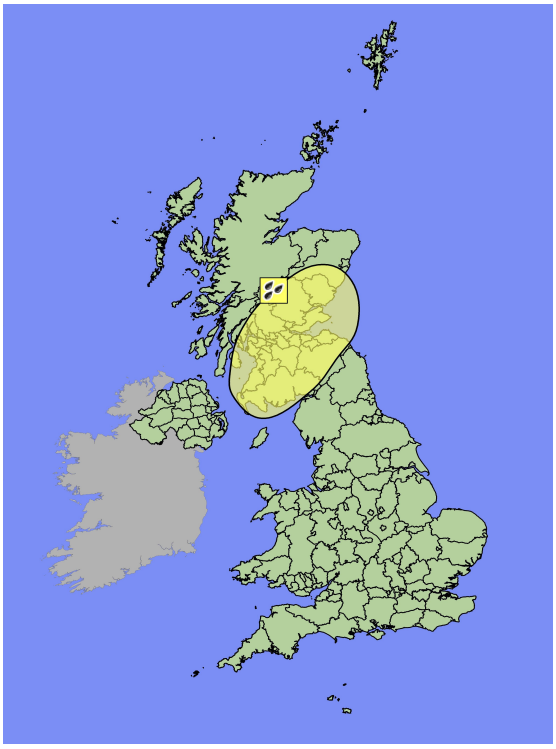
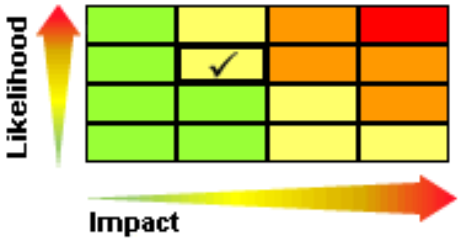
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system moving slowly northeastwards will bring large totals to some areas, with upland regions exposed to the strong east to southeasterly flow ahead of the front looking most vulnerable. Here there could be 60mm or more locally. Elsewhere totals are expected to typically lie in the range 20-40mm.

The speed of progression of the front remains somewhat uncertain however, and this will affect amounts.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:00 on Tue, 25th Oct 2011** until **23:59 on Tue, 25th Oct 2011**

A period of heavy rain will affect parts of southern, central and eastern Scotland during Tuesday. The rain will tend to ease from the south during the afternoon. Timings and extent of rainfall remain subject to some uncertainty. The public should be aware that there may be disruption to travel in a few places with possible localised flooding.
